3. Amsterdam
4. Pioneers
5. Transitions
6. Questions

DOUGHNUT ECONOMICS

WHAT IS THE DOUGHNUT?

Think of it as a compass for human prosperity in the 21st century.

THE DOUGHNUT'S DIMENSIONS

Social Foundation

The 12 dimensions of the social foundation are derived from the social priorities agreed in the Sustainable Development Goals (UN, 2015)

Ecological Ceiling

The 9 dimensions of the ecological ceiling are the nine planetary boundaries defined by Earth-system scientists (Rockström et al., 2015)

Seven ways to think like a 21st century economist

Seven Ways to Think:	From 20th-Century Economics	To 21st-Century Economics
1. Change the Goal	 GDP	 the Doughnut
2. See the Big Picture	 self-contained market	 embedded economy
3. Nurture Human Nature	 rational economic man	 social adaptable humans
4. Get Savvy with Systems	 mechanical equilibrium	 dynamic complexity
5. Design to Distribute	 growth will even it up again	 distributive by design
6. Create to Regenerate	 growth will clean it up again	 regenerative by design
7. Be Agnostic about Growth	 growth addicted	 growth agnostic

7 WAYS TO THINK LIKE A 21ST CENTURY ECONOMIST

FIRST GLOBAL SELFIE - 2017

Doughnut of social and planetary boundaries monitors a world out of balance

Andrew L. Fanning^{1,2,3} & Kate Raworth^{1,4,5}

The doughnut-shaped framework of social and planetary boundaries (the ‘Doughnut’) provides a concise visual assessment of progress towards the goal of meeting the needs of all people within the means of the living planet^{1–3}. Here we present a renewed Doughnut framework with a revised set of 35 indicators that monitor trends in social deprivation and ecological overshoot over the 2000–2022 period. Although global gross domestic product (GDP) has more than doubled, our median results show a modest achievement in reducing human deprivation that would have to accelerate fivefold to meet the needs of all people by 2030. Meanwhile, the increase in ecological overshoot would have to stop immediately and accelerate nearly two times faster towards planetary boundaries to safeguard Earth-system stability by 2050. Disaggregating these global findings shows that the richest 20% of nations, with 15% of the global population, contribute more than 40% of annual ecological overshoot, whereas the poorest 40% of countries, with 42% of the global population, experience more than 60% of the social shortfall. These trends and inequalities reaffirm the case for overcoming the dependence of nations on perpetual GDP growth^{4,5} and reorienting towards regenerative and distributive economic activity—within and between nations—that assigns priority to human needs and planetary integrity.

Getting our region on track

Great that all this doughnut inspired action is taking place here. But is done what's needed? Is the transformation happening? Is it fast and deep enough?

Why – We just entered a critical decade. Our mission is to ensure together that all doughnut inspired action effectively adds up to the systemic change we urgently need.

Currently people bringing doughnut economics into action, we mostly working in silos. We all know we need to work together, but we did not connect the network yet.

How – We act as a network of doughnut inspired change agents, connecting government, corporates, academia, SMEs, startups, commons and communities.

There is already so much being done. On what specific activities should we focus, as they have the biggest impact on realising our mission?

What
We visualise and connect the dots.

learn about the conditions required for change and run a yearly report on the conditions and change.

Key actions

Actions only appear in the lists to the right if no other organisation or network has committed to them (yet)

1. Get properly organised – and stay lean.
2. Connect the network via a community manager, meetup and online platform.
3. Connect a (sub)network of sponsors, for continuity and strategic support/embedding.
4. Create/offer overview of relevant related programmes and projects.
5. Coordinate the collaboration (and visiting with them) Kate Research and Doughnut Economics Action Lab (DEAL).
6. Run an event/program for connecting to a broader audience.

1. Initiate (and coordinate) regional collective learning about the conditions, connect researchers and knowledge institutions.
2. Collaborate with other cities (neighbourhoods, organisations, et cetera) around the world.
3. Collaborate with the DEAL network on resources and tools that help to bring Doughnut Economics into action.

1. Research, write, design, produce and publish the yearly report (working title: State of the doughnut's State of the doughnut dashboard).
2. Stimulate the development towards real time open State of the doughnut dashboard(s).

ABOUT ADC

The Amsterdam Donut Coalition (ADC)

is a network of people and organisations who want to collaborate and put doughnut economics into practice in Amsterdam.

Their mission is to get Amsterdam 'in the doughnut' asap by strengthening collaborations between pioneers in neighborhoods, knowledge institutions, companies and the municipality.

QUESTIONS

Which department in your (home) city could use a Doughnut Economic lens? And how could you combine social and environmental sustainability there?

FIVE LAYERS OF DEEP DESIGN OF A PLACE

Purpose

What is its purpose? What end does this place serve in the world - and is that vision shared by all involved?

Networks

How it is networked? What relationships are held here and how do its purpose and values to life through them?

Governance

How it is governed? Who has voice in decision making? What are the hard rules, and the unwritten culture, of how things get done? What are the metrics of success?

Ownership

How it is owned? What are the sources of wealth creation in this place, and who benefits from how they are owned?

Finance

How it is financed? What are the sources of finance here, and what does that finance expect and demand? What is extracted, what is reinvested and who does it serve?
